BEDS AND BED ACCESSORIES

Standard divan bed on legs and headboard

Ref. Alfreton Std & Royal Headboard

Fabric choice

- Really comfortable single size divan bed
- Quality sprung mattress with deep quilted Stitch-bond (not waterproof) cover for occupant comfort
- Base is mounted on six legs which have two glides fitted at the centre and two at the foot end. A pair of castors are fitted to the head end and this combination helps not only with moving the bed for cleaning but caters for close nursing to assist the bed-bound
- The Alfreton bed includes mattress and base however if you wish to order just a mattress the order reference for this is Ref. Eastfield
- The Royal headboard is comfortably padded, quality twin piped and fitted in seconds. There's a great choice of modern, traditional and practical fabrics at your fingertips

"I have been a customer for about 10 years. Service is always excellent. Thank you."
St. Josephs Nursing Home, Essex

Height	360mm (14")
Width	910mm (36")
Length	1930mm (76")
Max User Weight	114kg (18st)
Product Weight	17kg

Additional/replacement mattresses are available Ref. Eastfield

Water resistant divan bed on legs and headboard

Ref. Alfreton WR & Royal Headboard

Fabric choice

- Water resistant bed suitable for nursing home, residential home or home nursing
- The quality covering used on the mattress and base is "breathable" for user comfort not PVC which inevitably causes sweating and discomfort
- Base is mounted on six legs which have two glides fitted at the centre and two at the foot end. A pair of castors are fitted to the head end and this combination helps not only with moving the bed for cleaning but caters for close nursing to assist the bed-bound
- The Alfreton Wat bed includes mattress and base however if you wish to order just a mattress the order reference for this is Ref. Haringey
- The Royal headboard is comfortably padded, quality twin piped and fitted in seconds. There's a great choice of modern, traditional and practical fabrics at your fingertips

Height	360mm (14")
Width	910mm (36")
Length	1930mm (76")
Max User Weight	114kg (18st)
Product Weight	17kg

Additional/replacement mattresses are available Ref. Haringey

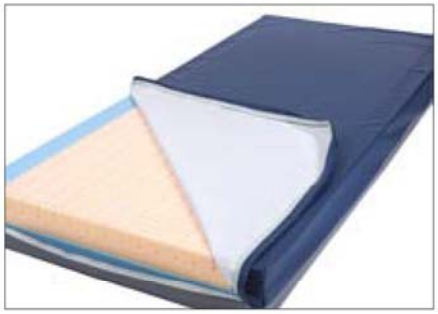
High/very high risk pressure relieving mattress

Ref. Softform Premier Original *+

- Effective pressure ulcer prevention. The mattress features a castellated insert that's constructed from geometric cut surface cells. These move independently to provide excellent patient comfort, reduce shear and friction and optimise pressure reduction, all of which minimises the build up of heat and moisture.
- The outer cover is made from a multi-stretch, waterproof, polyurethane fabric that features high-frequency welded seams and a full-length flap to conceal its zip. These key elements combine to prevent fluid entering into the mattress. The base of the mattress also features a toughened polyurethane coating to further increase its lifespan.

Full-length flap conceals zip By concealing the mattress's zip with a full-length flap, the risk of fluid reaching and contaminating the foam core is significantly minimised.

"If it's easy to clean it will be cleaned"



Single piece foam "U" core. This makes the transferring of patients easier by providing effective side-wall support. The robust foam base also prevents the mattress from bottoming out.

This mattress **does not require turning**, significantly minimising manual handling issues

Length	Width	Height	Maximum user weight	Weight	Cleaning
2000mm (78")	880mm (34") or 855mm (33")	152mm (6")	247kg (39st.)	13kg (2st)	80 degrees

Just four quick and easy steps to set up the mattress

Step 1
Detach the pipes from foot end of the mattress

Step 2
Fit pipes to the digital pump

Step 3
Switch on (no extra adjustments required)

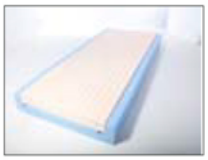
Step 4
The patient is now on an alternating surface

Cost-saving modular construction
The tubes that supply air to the cells sit in securely designed channels, providing added comfort. The top cover, bottom cover, foam insert, blue U core and individual air cells are all easily replaceable.

Very high risk dynamic pressure relieving mattress

Ref. Softform Premier Active 2 *+

Air cells
If accidental puncturing occurs, individual air cells can easily be replaced on a ward.



Power failure
If a power failure occurs, a patient is still resting on a "very high risk" pressure reducing surface, minimising potential pressure damage.

Intelligent software
You can view the status of the mattress via the LCD screen on the pump, which can be hung on a wide range of bed ends.

Cable and hose management
If not in use, the air hose can be fastened out of the way.

Protected pump hose
The pipes are fully covered with a welded sleeve for effective infection control.

STRIKETHROUGH RESISTANT TECHNOLOGY

THREE TIER CARE

864mm (34")	1955mm (76")	152mm (6")	14kg	Max. Weight 247.6 kg	Cleaning: 80 degrees

- As a static surface, the Softform Premier Active 2 mattress offers excellent relief to patients at risk of developing pressure ulcers. But with a discreet pump, it can be transformed into a dynamic surface providing additional levels of pressure relief. This doesn't require the transferring of a patient, minimising discomfort and manual handling. It also features a robust Strikethrough cover, which can withstand the rigorous demands of modern acute, community and residential care environments.
- The cover is made from a highly chemically resistant polyurethane polymer, which is very difficult to damage. It swells very little when fluid comes into contact with it and reverts to its natural state very quickly after cleaning. Its material is multi-stretch, breathable and waterproof with corner welds and prevents the accumulation of dust and liquid residues.
- The mattress's digital pump and air cells mean alternating between a static and dynamic surface can occur with minimum disruption. It only takes 10 minutes for the change to take place, during which patient comfort remains high and effective pressure relief is provided.

Warranties

Foam 8 years - Cover 4 years
Pump 2 years - Insert - 2 years

Please note: the cover is not Strikethrough proof. Misuse or incorrect care and handling can cause damage to the mattress cover.

4 Section profiling bed

Ref. Accent *+

Full-length wooden side rails are easy to mount without the need for tools

Easy to use hand controls provide maximum comfort and positioning

- One of the best value bed of its kind on the market
- Safety, functionality and comfort controlled by an easy-to-use handset
- Reliable - meets the highest standards for medical beds (IEC 6061-2-52)
- Specially designed mattress platform offering maximum support and appealing design, making it ideally suited to residential and care environments
- High-quality components that guarantee easy and safe operation for many years - backed by a 2 year warranty
- The optimised dimensions of the bed's mattress platform reduce shear and friction so occupants enjoy increased comfort when sitting up and don't slip down the bed

Safety notice
The tilt function of the bed should only be operated under medical supervision. The bed should not be used by patients under 12 or whose body size is equivalent or smaller to that of an average 12-year-old.

High performance ward bed bringing together an in-depth understanding of the changing requirements of the acute sector with state of the art manufacturing and assembly methods

- Low height reduces risk of patient falls
- Simultaneous operation of cardiac chair and tilt functions combined with auto regression improves positioning, mobilisation and rehabilitation
- Backrest and mattress angle indicators
- Low height foot end to improve patient visibility
- Removable head and foot ends are available in several colours for ward management
- Easy access CPR handle with CPR mechanism
- Integral bed extension
- Accessible location of handset for patient
- Blow moulded panels – durable, smooth, wipeable
- Newly designed linen shelf is easy to operate
- Extremely lightweight bed - easy to move
- The built in diagnostics port allows for swift and easy maintenance procedures
- Brake bar/pedal ensures easy access from head or side of the bed
- Triple function castors enable brake, free and track

Rest easy mattress stopper

Ref. Rackham *+

- Fits to foot end of bed
- Straps hold mattress securely
- Manufactured from plastic coated steel

Pillow lifter

Ref. Patton *+

- Easy to use hand control unit, allows precise positioning
- Breathable waterproof flame retardant mattress
- Emergency battery back-up in case of power loss
- Epoxy coated steel frame

Rest easy mattress elevator

Ref. Redford *+

- Electrically powered
- Simple to use hand control
- Gives independence to those with difficulty raising and lowering themselves in bed
- Adjustable width to suit most bed sizes
- Suitable for users weighing up to 255kg (40st)
- Emergency batteries allow up to 3 operations in the event of power failure

"Until this morning I thought that we had the best installation teams but it would appear that we have some competition. How refreshing it has been dealing with your company and what fine ambassadors your delivery chaps have proven to be."
