

USING LATEX FREE RUBBER BANDS IN A HOSPITAL ENVIRONMENT

RUBBER BANDS CAN HAVE VARIOUS PRACTICAL USES IN A HOSPITAL SETTING:

Rubber bands can be used to bundle and organize medical charts or paperwork, ensuring that patient information stays together and is easily accessible.

1

**ORGANIZING
MEDICAL
CHARTS**

**SECURING
IV TUBING**

2

Rubber bands can help secure intravenous (IV) tubing to prevent it from dangling or becoming tangled, ensuring a consistent flow during medical treatments.

In some cases, rubber bands may be used to secure dressings or bandages, providing a gentle but firm hold.

3

**SECURING
DRESSINGS**

**IDENTIFYING
TUBING**

4

Different coloured rubber bands may be used to distinguish between various tubes or lines connected to a patient, aiding healthcare professionals in quick identification.

Rubber bands can serve as temporary fixes for equipment or fixtures, providing a quick solution until a more permanent adjustment can be made.

5

**TEMPORARY
FIXTURES**

**BUNDLING
MEDICAL
SUPPLIES**

6

Rubber bands are useful for bundling together medical supplies or items, helping to keep them organized and easily accessible.

When applying gauze or cotton for wound care, a rubber band can be used to keep the material in place.

7

**SECURING
GAUZE OR
COTTON**

**SECURING
ROLLED
ITEMS**

8

Rubber bands can secure rolled items, such as sterile wraps or surgical drapes, to keep them in a compact and easily deployable form.

Rubber bands can be used to bundle together cables and wires, helping to keep areas neat and reducing the risk of tripping hazards.

9

**BUNDLING
CABLES AND
WIRES**

**ORTHOPEDIC
APPLICATIONS**

10

In certain orthopedic cases, rubber bands may be used as part of rehabilitation exercises to provide resistance during muscle-strengthening activities.
